PUBLIC SERVICE MONITOR LIGHT BAR

NS-50PSM

A unique solution to bring attention for Public Service Monitors, the flexible mounting system allows any LED/LCD screen to be used. Powered from the TVs USB socket and activating on motion there is no need for additional wiring or power supplies. The light tracing effect is triggered when a person is 4-5m in front of the unit, naturally drawing their attention to the screen.

- PIR sensor detects people approaching the monitor
- White LED traces from side to side when motion detected - attracting attention
- USB 2.0 powered from the monitor
- Energy efficient and low maintenance
- VESA mounts to rear of monitor and sits neatly below or above
- Suitable for a wide range of monitors from 28-65"
